

9.0 Twin Outboard

Designed as the "Four Wheel Drive of the Sea"™ the Naiad 9m maximises the essential elements of safety and stability. Using a 21 degree vee on a wide hull, the Naiad 9m is designed to carry up to 10 passengers speedily and safely to their destination in varied conditions.

Features:

- Forward or aft racking windows
- Custom navigation/electronics layout
- Custom tow post location and setup
- Ergonomic design

Powered by twin 150 h.p. outboards, the craft's top speeds are 41 knots (lightly laden) and 35 knots (with full load). With comfortable, economical cruising around 25-30 knots, this is the ideal craft for long distance, nine metres being the ideal boat length for traversing choppy seas generated by high winds.
