

# Naiad 11.3 Twin Jet

This 11.3 Naiad Coastguard features a large fully enclosed cabin with access to forward deck around wide walkways either side.

Raised shoulders providing a smooth ride

Fully enclosed cabin

Full suspension seating

Diesel inboard with HJ322 waterjets

Seating is for helm and three crew plus sides seats aft. The dashboard is laid out to the crew's specifications to accommodate their state of art electronics. There is a small galley forward portside with toilet on starboard side. Windows throughout the cabin give excellent visibility and suspension seating provides a comfortable ride for crew. A 2.5 Naiad tender is situated aft for easy launching to attend inshore rescues.

Power is by twin Yanmar 370hp diesel engines with Hamilton 322 jet drives. A new and exciting feature is the use of Blue Arrow manoeuvrability whereby low speed steering is by a "mouse". Berthing is so simple, just move the mouse where you want to go and the boat obliges making the extra cost of Blue Arrow very worthwhile. This Naiad is built for rugged sea conditions and performs exceptionally well in large seas.

## Specifications
